Turn your backyard into a natural habitat for birds by feeding them year-round. A plentiful supply of Pennington's vitamin enriched bird food will attract newly hatched birds, as well as many other varieties of seasonal migrating birds. Fresh seed, a clean feeder, and a constant supply of clean water are preferred by birds. To attract a wider variety of birds, use multiple feeders placed in different locations in your yard. This helps ensure that all birds are able to feed.

WE RECOMMEND THESE PENNINGTON® BIRD FEEDERS
