Step 13 .

Cord Protector

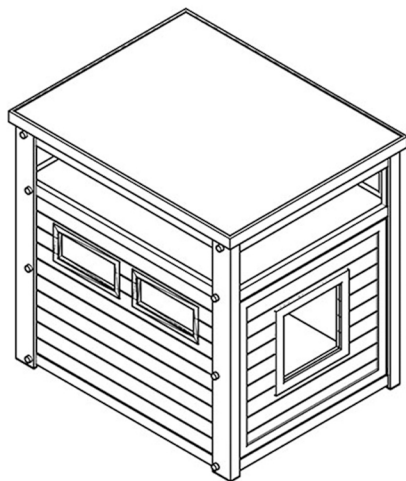

Window Trim

Step 14 .

Turn Litter Loo over and attach self adhesive , anti-scratch pads to the bottom of the columns as shown.

Complete : _____

Keep Clean for a Healthy Pet

It is important that your Habitat 'n Home Litter Loo be kept clean for the health of your pet. Here's where the use of ecoFLEX as the main component is a big advantage combined with our simple, easy no tool assembly.

Since little sticks to ecoFLEX, in most cases, all you will need to do is wipe up any misses or to do a general cleaning. If you want a more thorough cleaning, you can use a little dish washing detergent. Wipe dry and you're done.

Regular cleaning will add to your - and your pet's - enjoyment of the Litter Loo.
