ORIGINAL AQUARIUM GRAVEL CLEANER

INSTRUCTIONS AND PRECAUTIONS

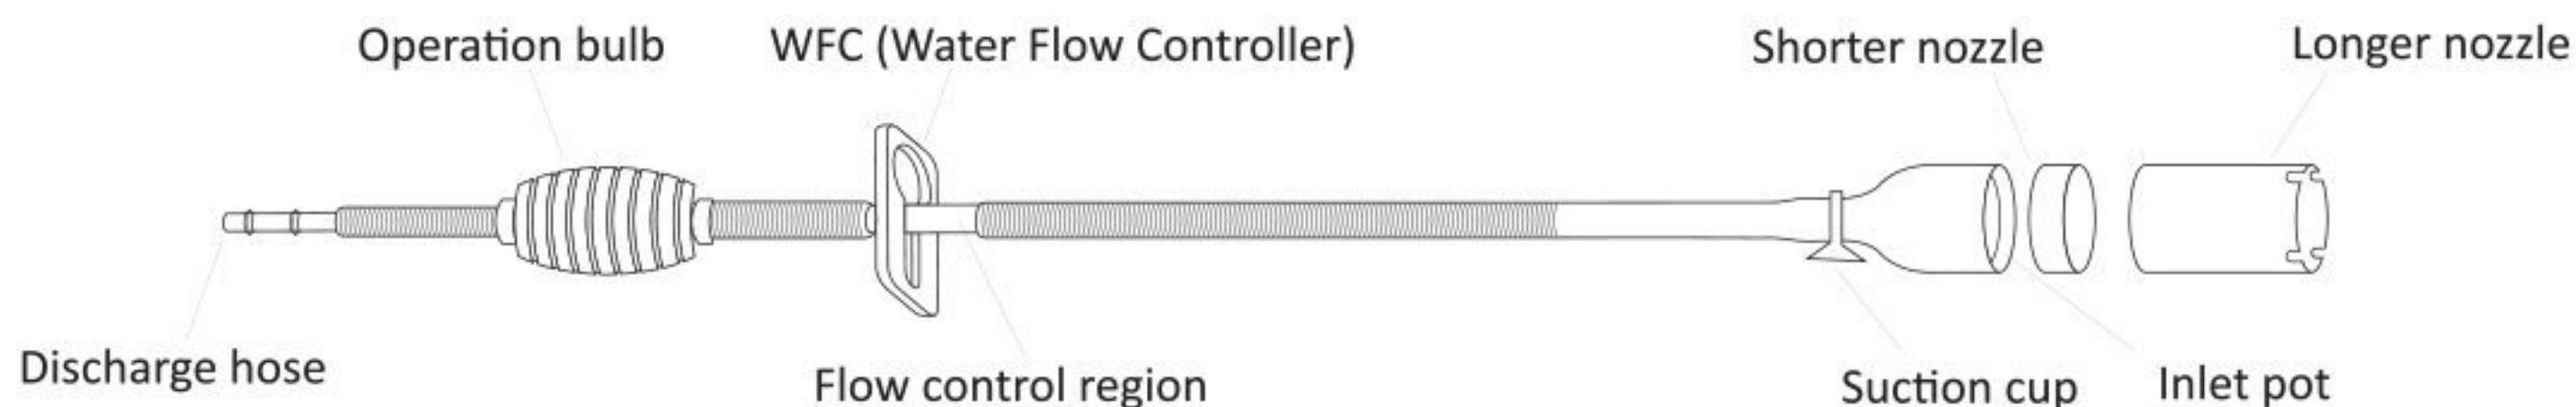

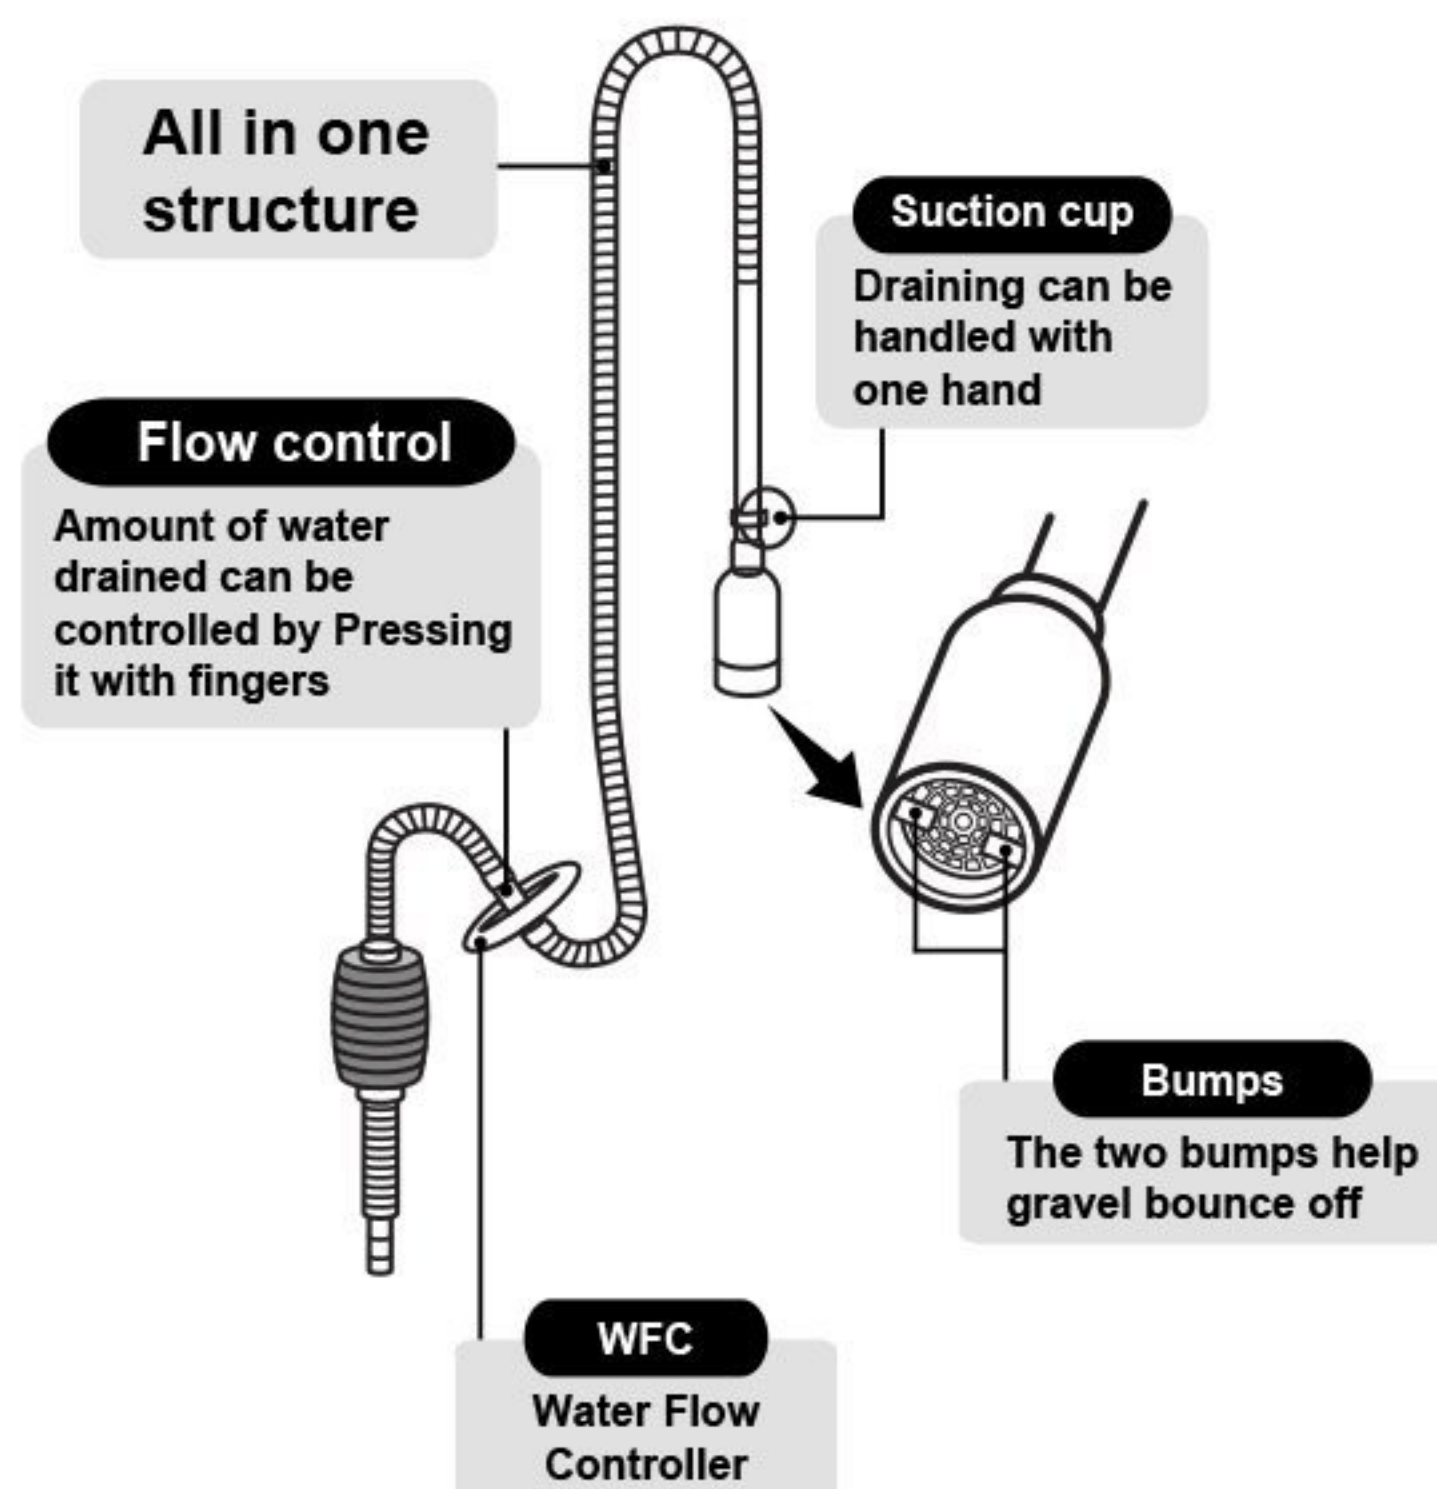

**SAVE THESE INSTRUCTIONS.
READ ALL PRECAUTIONS AND INSTRUCTIONS.**

FEATURES

- * Easy-to-use cleaner pump for aquarium.
- * Use it with one hand (Glass suction cup included.)
- * Give your fish better living environment.
- * Quickly and easily remove waste and water.

It doesn't hurt any aquarium fish when using.
It can take the waste out too while replacing the water.
User-friendly siphon work.

1. Shorter nozzle can be used for draining (removing) water or/and/ to clean up sand in the lower layers.
2. Longer nozzle can be used to clean up fish's leftover food, droppings and fine gravel or sand.
3. WFC (Water Flow Controller) controls the amount of water flow. Placing the Flow control region at "Sand and gravel cleaning" of WFC reduce the amount of water drained and allows easier cleaning. Placing it at "Draining as well as cleaning" is for full flow.
4. Press the Flow control region with your fingers to empty the nozzle when it is blocked.
5. When the Suction cup is attached to glass, it can be operated with just one hand.

* Packaging comes with zip lock bag for convenient storage after use.

CAUTION

1. This pump is only to use for aquarium (Do not use it for other purposes.)
2. Do not use for pumping KEROSENE or GASOLINE.
