THE BENEFITS OF AIR DRIED

We believe that the more you know, the better you'll feel about what you're feeding your dog. When food is air dried, most moisture is pulled from the ingredients through evaporation during a natural air-drying process. Still, enough moisture stays in the food, so it does not need rehydration.

- We gently air dry our NOBL Jerky air dried treats in small batches to maintain nutrients and flavor
- We adhere to a complete safety and sanitation program and test our goods for compliance
