

Setup Instructions

WARNING

- For safety, remove leash and collar before allowing pet to enter the crate.
- Do NOT stand or sit on the crate.
- NOT intended for use by children. The crate is NOT a toy.
- Use the crate on level surface.
- Do NOT block ventilation in the crate.

1. Lay the crate flat on the floor. Release the two side clips used to keep the crate in the folded position. Gently pull the front and back panels of the crate to the vertical position.

2. Stand to one side of the crate. Reach inside to grasp the two piece top bar with both hands. Gradually pull the two bars upward so that they join each other. Slide the closure sleeve over the connection until it is fully extended and frame is rigid. Repeat the same process for the other side.

CAUTION: Be careful not to pinch your hand at the connection point.

3. The soft crate includes two important features designed for your pet's safety. When your pet is in his/her crate with the door closed, always lock the door. When your pet is allowed to use the crate with the door open, always roll the mesh door up and fasten with the velcro strap provided as shown.

Door locked

Door Open and Secured
