HERE IS OUR CHECKLIST FOR YOU TO START

1 Always double check your battery life and connection of the unit
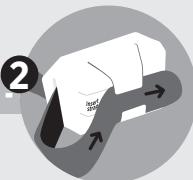

2 Pass the strap through the left, center, and right loops according to the direction of the arrow and fasten it

3 The best position is on either side of the dog's neck. Ensure a snug fit making skin contact*

TAKE YOUR TIME THIS IS NOT A RACE

5 Make sure your dog understands commands before layering the e-collar over

4 Know your dog's conditioning level **

ⓘ **Please reference following chapters in the online manual for more details:**
* <How to use the receiver>
** <Get Maximum Distance>

6 Use positive reinforcement as needed when training with the e-collar
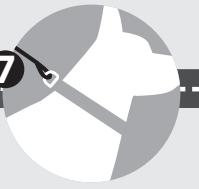

7 Don't go completely off leash until you have proofed the recall on a long leash line WITH distractions

For more details & troubleshooting, check out the full online manual here!

TURNING THE UNIT ON/OFF

Green = Full charge
Amber = Medium charge
Red = Needs charge

The remote transmitter's power button is located on the bottom right. The receiver's collar power button is located between the contacts. Press and hold the power button for 2 seconds to turn it on or off. The LED indicator will turn solid green with a tone when the unit powers on and a red light with a tone when it powers off. (Press the power button briefly to turn on the backlight.)

PROGRAMMING BETWEEN NICK AND CONSTANT
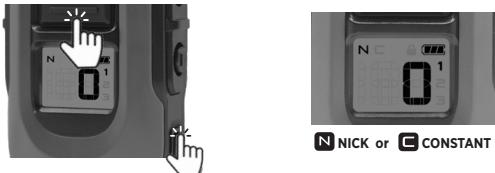

N NICK or C CONSTANT

1) Set the stimulation level to " 0 ".
2) Hold both the main front button and side power button together for 5 seconds to program Nick or Constant mode. The selected mode will be displayed on the top of the LCD screen.

SIDE BUTTONS

1) Boosted Constant
2) Tone
3) XPP Vibration
4) Locate Light

ⓘ LCD Display

1) Boosted Constant
Boosted Constant button customizes your desired immediate level jump without having to manually increase the level, which can be applied up to 12 seconds. To set up, please follow the below steps:
1) Set the level at "0".
2) Hold the Boosted Constant button until LED light on the transmitter is blinking.
3) Use the rheostat dial to select the Incremental Amount to jump.
4) Press the Boosted Constant button again to complete the set up.

ⓘ Example
Selecting "5" as the Incremental Amount for the Boosted Constant button will apply the output level of displayed level + 5, as shown below.

Base Displayed Level	Incremental Amount	Boosted Constant Output
1	+5	6
5	+5	10

Applies Displayed Base Level.
In this case, level 5 'Nick' will apply.

Press

Applies 'Boosted Constant' for up to 12 seconds. In this case, level 10 'Constant' will apply.

Press and hold
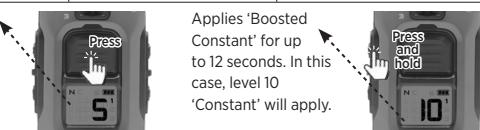

2) Tone
Emits a beeper tone without applying stimulation for up to 12 seconds.
3) XPP (Extreme Performance Pager) Vibration
Provides a non stimulating vibration for up to 12 seconds.
4) LED Locate Light
Uses a 1000 lux LED Light on the receiver to locate your dog in the dark.
- For continuous blinking, every 4 seconds, tap the Locate Light button once. To disable the continuous blinking, tap Locate button again.
- To manually enable the continuous blinking, press and hold the Locate Light button which can stay blinking for up to 12 seconds.

CHARGING THE BATTERY
Use the 2-port USB-C battery charger to charge the receiver and transmitter concurrently. You can use other USB-C cable to charge individually. For optimal performance, only use Dogtra-approved batteries and accessories for your Dogtra e-collars.

Two-Dog Unit Only
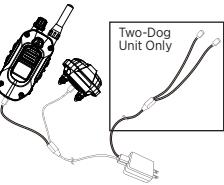

SAFETY STIMULATION LEVEL LOCK
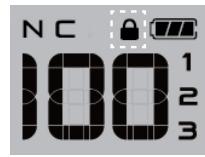

Stimulation level lock indicator

To prevent the stimulation level from changing unintentionally, press down the top of the Rheostat dial for more than 2 seconds to lock it. When locked, a lock icon will appear on the LCD screen. To unlock, press down the top of the Rheostat dial for more than 2 seconds.

HOW TO ADD ADDITIONAL RECEIVER DEVICES

1. Turn on the transmitter and set the stimulation level to "0". Use the toggle to select the desired dog (1,2 or 3).

2. To begin pairing receiver must be off. Initiate pairing mode by pressing and holding the power button for 5 seconds until the LED starts blinking and then release.
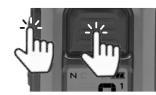

3. Simultaneously press the front transmitter button and side Boost button until the screen reads "CD****" then release. Confirm successful pairing by pressing Pager vibration.

Repeat the pairing process if the pager vibration test is unsuccessful. The pairing between the devices has timed out or failed.
