Indications
For use as a digestive aid in replacement therapy where digestion of protein, carbohydrate and fat is inadequate due to exocrine pancreatic insufficiency.

Description
PanaKare Plus is a pancreatic enzyme concentrate of porcine origin.

Dosage and Administration
Administer with each meal.
Dose is estimated according to the severity of the condition and weight of the animal. Once clinical signs are controlled, dose may be reduced to lowest effective dose.

Add to moistened pet food (canned or dry) prior to feeding. Thorough mixing is necessary to bring the enzymes into close contact with the food particles.

After mixing, let stand at room temperature for 15-20 minutes (minimum).

Average Dose/Meal
Dogs: 3/4–1 teaspoon
Cats: 1/4–3/4 teaspoon

Powder contains
Lipase ............................................................. 71,000 USP units
Protease .......................................................... 388,000 USP units
Amylase ............................................................ 460,000 USP units

Warnings
For animal use only.
Not for human use.
Keep out of reach of children.

Caution
Federal law restricts this drug to use by or on the order of a licensed veterinarian.
Discontinue use in animals with symptoms of sensitivity.

Oral and/or tongue ulceration may occur at higher doses. Ulcers typically resolve with a reduction in dose or slight dilution of product with water.

Storage
Store at a temperature between 15°-30°C (59°-86°F). Keep lid tightly closed.
