Thank you for purchasing the Travel Bike Basket for Pet by K&H Pet Products. When used properly, your Travel Bike Basket should provide you and your pet years of comfortable and easy travel together.

SMALL Travel Bike Basket recommended for dogs up to 10 LBS. **LARGE Travel Bike Basket** recommended for dogs up to 20 LBS.

ASSEMBLY & INSTALLATION INSTRUCTIONS:

1

Take the product out of the box and lay all pieces on a flat surface. **See Figure 1.**

2

To mount your K&H Travel Bike Basket to your bike's handlebars, first locate the black metal mounting bracket and hold it with the two curved metal sections facing in the upright position as shown in **Figure 2**. The two curved sections at the top will eventually rest onto your handlebars.

3

Next, locate the two, 3-inch rubber straps with the four holes in them and slide one strap onto one of the curved end pieces of the mounting bracket. Make sure you slide it through the very bottom 4th hole of the rubber strap. **See Figure 3.** Repeat this step on the other side.

4

Once a rubber strap is on both sides, it is important to now position each of them as shown in **Figure 4** before moving on to step 5 below. These straps will be used later on in the installation process to help secure the metal mounting bracket to your handlebars.

5

Next locate the two, 2.5-inch rubber handlebar protection guards and notice there are openings on both ends. Feed one of the open ends of a rubber guard onto one of the curved end pieces of the mounting bracket. **See Figure 5.** For proper positioning, make sure that the open middle channel of the rubber handlebar guard is in the upright position.

6

Continue to feed the rubber handlebar guard over the curved end piece and then through the second hole on the other end of the handlebar guard as shown in **Figure 6**. It should fit snugly against the underside curve in the metal mounting bracket. Repeat this step on the other side. The final and correct resting position of the rubber handlebar guards is shown in **Figure 7**.

7

Next, find the plastic extension piece that has the bolt through the center. This extension piece will attach to the metal mounting bracket that you just assembled. Holding the metal mounting bracket with the curves in the upright position again, snap the plastic extension piece onto one of the 4 metal horizontal crossbars as shown in **Figure 8 & 9**.

Please note that the plastic extension piece can be mounted two different ways. It can be flipped either up or down on the horizontal crossbars depending on which fit works best for your individual bike. You have the option to rotate the plastic extension piece 180 degrees **LATER ON** if needed. **See Figure 9.**

8

Now with your bike stabilized, hang the two curved areas of the metal mounting bracket over the **FRONT** of the handlebars making sure the rubber handlebar guards stay in place and rest directly onto the handlebars. These guards will help to keep the metal mounting bracket from slipping, and also help to protect your handlebars. **See Figure 10.**

CONTINUED...

9

IMPORTANT: At this time, the curved end of the plastic extension piece should also rest comfortably across the curve of your bike's head tube. **See Figure 11. TIP #1:** You may need to experiment with moving the entire plastic extension piece onto the different horizontal crossbars of the metal mounting bracket until its curved end fits well up against the curve of your bike's head tube. **TIP #2:** You may also have to flip the plastic extension piece upside down, (180 degrees), in order to find the right fit for your bike's head tube. **Again, see Figure 9 for further instruction if needed.**

10

Once the metal mounting bracket is resting on your handlebars and the extension piece is snapped onto the mounting bracket in the proper place, hold firmly against the handlebars and stretch one of the 3-inch rubber straps from earlier around the **UNDERNEATH** side of the handlebar. Hook one of the open holes in the rubber strap onto the corresponding curved metal end piece. **See Figure 12.** Make sure this is stretched tight. Repeat this step on the other handlebar.

Figure 13

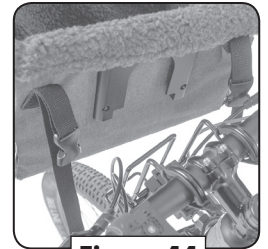

Figure 14

11

Locate the supplied wrench and tighten the nut on the plastic extension piece so that it is snug, making sure to keep its curved end in place resting comfortably along the curve of your bike's head tube. **See Figure 13.**

12

Now it's time to attach the K&H Travel Bike Basket to your bike. Slide the sturdy opening on the back of the Bike Basket over the front of the bike mounting bracket as shown in **Figure 14.** Slide down until the Bike Basket is resting on the metal support piece located at the bottom of the mounting bracket.

Figure 15

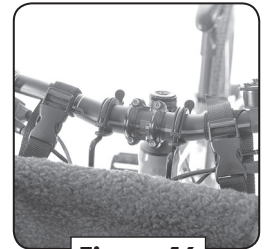

Figure 16

13

Finally, there are two nylon straps on the Bike Basket that attach to your handlebars to provide extra safety and support. On one side, wrap the nylon strap around your handlebar and feed the end of the nylon strap through its buckle as shown in **Figure 15.** Repeat this step on the other side. Now you can make final adjustments by tightening or loosening the straps against your handlebars. **Be careful** not to impede or strap down any of your bike's brake cables or gear cables. Facing the front of your bike, the nylon straps and curved ends of the metal mounting bracket that are now rubber strapped to your handlebars should look like the image in **Figure 16.**

Figure 17

Finished!

14

Lastly, attach the two leads located on the bottom inside of the Bike Basket to your pet's collar or harness to keep them securely inside of the Bike Basket at all times. **See Figure 17.**

To detach the Bike Basket from the nylon straps on the handlebars, simply squeeze the sides of the clasps to unfasten them. To remove the Bike Basket simply lift the basket off of the mounting bracket.

Congratulations! You and your furry friend are now ready to hit the bike path or cruise around town in your new K&H Travel Bike Basket. Happy and safe riding together!

CARE INSTRUCTIONS:

The cover is removable and machine washable. Line drying is recommended. The outside can be wiped clean with a damp cloth.

K&H Limited One Year Warranty

Our warranty is as follows: K&H Pet Products warrants to the original consumer, that this product will be free of defects and workmanship for a period of one year from the date of purchase. The manufacturer's liability hereunder is limited to replacement of the product. This warranty is void if the product has been damaged by accident, unreasonable use, neglect, tampering, or other causes not arising from defects in material and workmanship.

To exercise your warranty: If, during the warranty period, your product malfunctions, return it to the place of purchase with your **original purchase receipt.** If this cannot be done, return the product, postage prepaid, to K&H Pet Products, with a **dated proof of purchase or original date receipt.** A return authorization number can be obtained by calling (719) 591-6950 and must accompany all returns to manufacturer. Please include a note explaining the problem when returning the product.
