❷

WARNING:
Not for use with aggressive dogs. Do not use this product if your dog is aggressive, or if your dog is prone to aggressive behavior. If you are unsure whether this product is appropriate for your dog, please consult your veterinarian or certified trainer.
· For use with dogs over 6 months of age and over 8 lbs.
· **DO NOT** use when the dog or the collar is / are wet.
· This is not a toy, not for use on children. For dog use only, should only be operated by responsible adult.
· DO NOT charge device near flammable substances.
· Your pet should not vocalize or panic when receiving stimulation. If this happens, the stimulation level is too high, and you need to go back to the previous level and repeat the process.

CAUTION:
· For on leash training. Do not attach leash to training collar. Use a regular collar in addition to the training collar.
· Risk of skin damage. Please read and follow the instructions in this manual. Proper fit of the collar is important. A collar worn for too long or fitted too tight on the dog's neck may cause skin damage ranging from redness to pressureulcers; this condition is commonly known as bed sores.
Do not leave the collar on the dog for more than 12 hours per day.

❸

· When possible re-position the collar on the dog's neck every 1 to 2 hours.
· Check the fit to prevent excessive pressure; follow the instructions in this manual.
· Never connect a leash to the electronic collar; it will cause excessive pressure on the contacts.
· Wash the dog's neck area and the contact probes of the collar weekly with a damp cloth.
· Examine the skin contact area daily for signs of a rash or a sore. If a rash or sore is found, discontinue use of the collar until the skin has healed. If the condition persists beyond 48 hours, see your veterinarian.
· This product comes with two pairs of plastic contact points, use the suitable size to fit your dog's fur.
· Bark collar meets IP3 waterproof rating. It is protected against splashing/spray.

These steps will help keep your dog safe and comfortable. Some dogs are sensitive to skin contact pressure. You may find after some time that your dog is very tolerant of the collar. If so, you may relax some of these precautions.

❹

It is important to continue daily checks of the skin contact area. If redness or sores are found, discontinue use until the skin has fully healed.

Rechargeable Lithium-Ion Battery Information
· Do not disassemble battery compartment.
· Product contains a non-replaceable 500mAh battery. If battery is exposed or removed, please ensure that the battery is properly disposed of in accordance with your local waste rule regulations.
· Discontinue use if product is damaged.
· If you think battery might have been swallowed or placed inside any part of the body, seek immediate medical attention.
· Battery should be charged prior to use. Use an adapter with 5V/500-1000mA output.
· Charge battery periodically when product is not used for an extended period to extend battery life.
· Do not use product while it is being charged.
· Do not store the product in locations where the temperature will exceed 60C/140F.
· If you think the batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.
· Please ensure that the product with batteries are properly disposed of in accordance with your loacl wast rules regulations.

Fitting the Collar to Your Dog

PLEASE ENSURE THAT THE COLLAR IS FITTED CORRECTLY.

1. Center the Metal Probes under your dog's neck (Image A).

A

2. The collar should be positioned snugly around your dog's neck.
Important: Make sure you can fit one finger between the strap and your dog's neck (Image B).

Note: Choose the correct Metal Probes that suit the length of your dog's hair or fur. If your dog has long hair or a thick coat, use the Longer Metal Probes.

B

⓬

⚠ CAUTION!
- Do not allow your dog to chew the collar. Prevent your dog from scratching or clawing at the casing.
- This device is made of plastic and electronic components that are not digestible. Consult your vet immediately if your dog swallows any parts of this product.
- This product is NOT intended for use on dogs under 6 months old and less than 8 pounds.
- NOT for use with aggressive dogs. Use the product under supervision.
- Don't leave this collar on your dogs over 12 hours per day.

Tips for Training Your Dog with the Anti Bark Collar
Please don't leave your dog alone when you first start training your dog.
You should train your dog with some commands (such as "NO!") when they bark, the collar reinforces the command.
Your dog should be able to learn that the collar is to stop their bark.

⓭

FAQs
Q: What kind of dogs are the collars suitable for?
A: The collar is adjustable in length from 9.5 to 26 inches. If your dog's neck is smaller than 26 inches, please cut the redundant part.

Q: My dog barks, but the collar isn't activated.
A: The collar battery may be running low, please charge it. Please ensure to fit the product snugly, yet loose enough to allow one finger to fit between the strap and your dog's neck. Some dogs have weak barking, in this case you will need to increase the sensitivity level. Thicker coating on the neck area may also decrease the sensitivity of the collar from barking. If necessary, trim the coat near the area where you place the product.

Q: Is the bark collar waterproof?
A: It is waterproof, such as walking on a rainy day, but you must seal the charging port tightly and keep it dry if it gets wet.

Q: Can I attach a leash to the collar?
A: No. This will result in the metal probes being pulled too tightly against your dog's neck. If you need to put a leash on your dog, put a seperate NONMETALLIC collar on your dog's neck first.

Q: Can I charge this product with any type of charger?
A: No, we recommend to use a charging adapter rated at 5V/500-1000mA because a charging adapter rated at 9V or 12V

⓮

may damage to your device.

Q: How do I know if I can use this product on my pet?
A: The product is designed for healthy dogs over 6 months old, weighing no less than 8 lbs. Most importantly, the product can not be used on unhealthy or aggressive dog. If you are unsure whether this product is appropriate for your pet, consult your veterinarian or a certified trainer.

Q: Can I used this product when there are other dogs playing around?
A: Dogs will bark when playing and get excited, for the comfort and safety of your pet, we do not suggest using this product in such an environment.

Q: Why is the product triggered sometimes in a noisy environment thought the dog isn't barking?
A: Even though we have optimized the barking detection, some environment noises may have a similar frequency of a barking dog, which may potentially activate the product. In this case lowering the sensitivity level can eliminate this.

Q: Is the bark Control Collar safe and humane?
A: Yes. The Bark Control Collar is designed to get your dog's attention, not to punish them. However, the initial static shock correction may startle your dog.
