3. Quick Setup | 8

(1) Please scan the following QR code and download PETFON APP.

(2) Register and Login, if you already have Petfon APP in your phone, the above two steps can be ignored.

(3) Open Bluetooth in your cellphone.

(4) Go to"≡" → "Devices"→"+"→"Mesh".

(5) Press and hold power key for 3 seconds to turn on Mesh.

(6) Please scan for Mesh to bind with it.

(7) Go to "≡" →"Settings"→"Home".
①Turn on "Home"   ②Set your WiFi network
③Set your home location
Please ensure you have chosen the right location, it will affect Mesh's positioning performance in the future.

(8) Go to "≡"→ "Devices"→"Mesh", set Mesh's Work cycle.

(9) Choose a place outside the house where it is two meters above the ground to install Mesh. During this process,check Mesh's signal strength, make sure that Mesh's signal in your selected position can reach three or more grids.

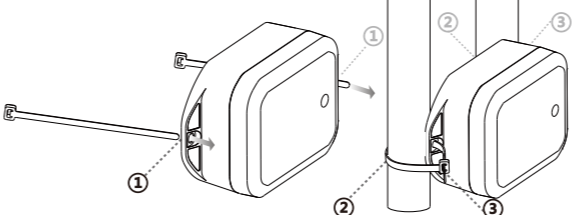

| 9

(10) Install Mesh:

Bolt Installation:
①Drill a hole with an electric drill
②Insert the expansion bolt into the hole
③Tighten the screw in the hole to mount Mesh
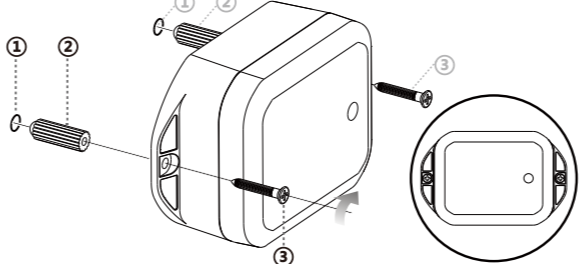

Straps Installation:
①Use two straps to pass through the mounting holes
②Fix Mesh's position
③Buckle the two straps

(11) You are ready to go.

---

---

6. Standard Scenario | 11

(Cellphone+Internet+Controller+Mesh+Tracker)
Requirements: Home WiFi, Cellular network, Bluetooth.

Smartphone   Internet   Controller   Mesh   Tracker
Other Authorised Devices
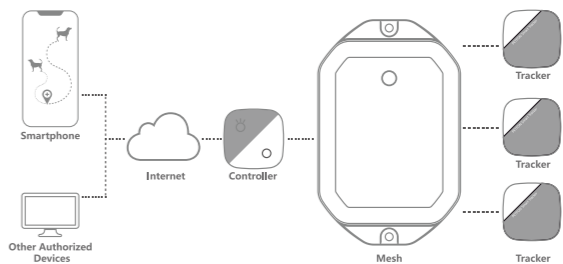

1) Connect your cellphone to internet (Cellular network or WiFi).
2) Open "Home" in your Controller, and connect it to WiFi network.
3) Mount Mesh on a higher place such as a roof or tree, to increase coverage.
4) With Mesh, the Tracker's working range can be extended to 3~6 miles. You can check your pet's location in real time with no distance limit.
You could track your pet with no distance limit. Just make sure you have a good internet connection in both your phone and your house. You would be able to check your pets' location anywhere in the world with unlimited range. Controller's power consumption will be relatively higher in this mode, so it is recommended to put it in the charging box for continuous charging.
