# Happy Ride™ DOG BARRIER

Connect the three support rod pieces. Insert the support rod into the pockets on the dog barrier.

Install the dog barrier with the support rod facing the front seats. Wrap each strap around the headrest posts and cinch the straps tightly through the metal rings.

Push the white seat anchor in between the passenger seat back and seat bottom. Tighten the seat anchor strap so that the bottom edge of the barrier rests firmly against the front seats or console.
