GEN7PETS PET RAMPS

Model Numbers G7572NS (Natural-Step) & G7072FL (Feather-Lite)

How to use your new ramp

- To open, simply push the button on the side of the ramp and pull the two halves apart.

- To ensure that the ramp is properly closed, make sure that you hear the latch click and that the halves won't separate.

- Attach the ramp tether to the rear latch hook of the vehicle when possible. This provides an extra measure of safety. Note, it may not be possible to attach to all makes and models of vehicles.

- Always be sure that the tether side of the ramp is resting on vehicle to ensure that the ramp is not upside down.

Training your pet to use your new ramp

1. Open your ramp and lay it flat on the floor.
2. Leash your pet and walk it back and forth on the ramp while still on the floor. This will help your pet to become comfortable and familiar with the ramp.
3. Use treats if needed.
4. Raise the ramp into position on the back of a vehicle.
5. Leash your pet and walk next to the ramp while your pet walks up into the vehicle. It would be a good idea to do this repeatedly until your pet is completely comfortable using the ramp.

Proper care of your ramp

- Make sure that your ramp is properly locked during transport.
- To wash, simply spray down entire ramp with water. Allow to air dry.
- This is intended to be used by pets only and for those weighing under 250lbs.
